3| Deviation detail

3.1 | Description of the deviation:

**Guidance* Use the space below to describe the deviation and substantiate the reason for requesting deviation from applicable rules/requirements. Please include all relevant information in support of the request. You are requested to follow the principles for requesting deviations, given in the [Deviation Approval Procedure/ Design Change Requirements](#).*

3.1.1 | Deviation detail (to be completed by Project developer):

Due to increasing of installed capacity in the project area before commissioning, the progress of work at the plant slowed down and delay of the operation time. Therefore, after capacity increase took time to start operation for plant. This also affected the validation process and more than 2 years after the listed in GS Registry.

3.1.2 | VVB opinion (to be completed by VVB, if applicable):

N/A

3.2 | Assessment of the deviation:

**Guidance* Use the space below to describe how the deviation complies with the requirements, and, where applicable, the accuracy, completeness and conservativeness is ensured. Please include all relevant information in support of the request.*

3.2.1 | Deviation assessment (to be completed by Project developer):

There are two main changes in the project activity; the start date of project operation and the capacity increase. The listed of the project is 21/10/2010. However, after this date because of the increasing capacity, the 2-year period was missed. This capacity increase was stated in the Project Design Document. We would like to start the validation process immediately to avoid further delays and the deadline of the validation is 23/11/2021 according to GS.

3.2.2 | VVB opinion (to be completed by VVB, if applicable):

N/A

3.3 | Impact of the deviation:

**Guidance* Use the space below to describe the impact of the deviation on project design, safeguarding principles assessment, SDG assessment, emissions reductions, monitoring frequency, data quality, potential risk or any other relevant aspect of the project. Please substantiate the impact assessment with relevant and verifiable data/information.*

3.3.1 | Impact assessment (to be completed by Project developer):

The fact that the facility could not be into operation on the expected date and work could not be completed in the expected time. Therefore, this situation caused difficulties to start validation process within 2 years.

No negative impact is expected on project design, safeguarding principles assessment, SDG assessment, emissions reductions, monitoring frequency, data quality, potential risk or any other relevant aspect of the project.

3.3.2 | VVB opinion (to be completed by VVB, if applicable):

N/A

3.4 | Documents:

**Guidance* List of documents provided (note that once a decision has been made by Gold Standard, this deviation form along with supporting documents will be made public on the Gold Standard website. If any of the supporting documents are confidential, please indicate here to ensure they are omitted.)*
