### 3 | Deviation detail

#### 3.1 | Description of the deviation:

3.1.1 | Deviation detail (to be completed by Project developer):

As per the Clause 5.1.46 of the Principles and Requirements Version 1.2 "Delay in the completion of re-validation beyond the last date of current certification cycle shall result in a reduction of any issuance of Certified Products and/or Impact Statements available during following certification cycle (for example, a delay of 1 year beyond the first cycle shall mean that no Certified Impact Statements shall be issued for the period of delay)".

The first crediting period of the project activity is 02/01/2011 to 01/01/2018. The date of the Final Validation Report (FVR) of the second crediting period of the project activity is 22/09/2022.

The duration of the second crediting period is 02/01/2018 till 01/01/2025.

Hence as per the principles and Requirements version 1.2, the credits can only be claimed for the period 22/09/2022 Till 01/01/2025.

Kind request to approve this deviation of exemption of loss of claimable period and allow us to claim the credits for the entire second crediting period i.e. 02/01/2018 till 01/01/2025 and conduct the GS verifications of retroactive period without loss of claimable period.

3.1.2 | VVB opinion (to be completed by VVB, if applicable):

Not Applicable

**3.2 | Assessment of the deviation:**

3.2.1 | Deviation assessment (to be completed by Project developer):

Since all the relevant parameters are being continuously monitored, thus the project developer is requesting GS to allow the verification of the entire second crediting period.

The deviation does not attract any kind of risk upon environmental integrity and all the SDG contributions are being achieved in-line with the Design Certified PDD.

3.2.2 | VVB opinion (to be completed by VVB, if applicable):

Not Applicable

**3.3 | Impact of the deviation:**

3.3.1 | Impact assessment (to be completed by Project developer):

The above deviation will not cause any impact upon the data quality or attract any potential risk on GS related to any issuance or any other material impact affecting the quality of the project and thus no any potential risk is attributed to GS Project activity in particular.

The deviation requested adheres to the Principles and Requirements set forth by GS4GG and complies with:

- Environmental Integrity- The GSVER’s generated from the project activity are not over estimated as a result of deviation and conservativeness are ensured.
- Contribution to Sustainable Development Goals- SDG contributions that the project is designed to achieve are inline with GS4GG requirements and the above deviation does not have any potential impact upon the certified SDG’s claimed during the entire crediting period of the project activity.
- Safeguarding Principles and requirements- The deviation does not create any impact upon the safeguarding principles and requirements set forth by GS4GG
- Compliance with Host Country Regulations- The project does not create any conflict with Host Country regulations and all the host country regulations are followed.

Thus, Kind request to approve deviation to the project developer otherwise the project will suffer loss of one complete vintage year and will be a huge financial loss to the developer as well as the Host Country Turkey.

3.3.2 | VVB opinion (to be completed by VVB, if applicable):

Not Applicable

**3.4 | Documents:**

1. Final Validation Report (FVR) for the Second Crediting Period
